19 West Fourth St., 6th Floor, New York, NY 10012-1119

PROFESSIONAL SUMMARY

I am a Ph.D. candidate in Economics at New York University, specializing in macroeconomics and the interplay between firm and market structures with individual and aggregate outcomes. My research spans labor and financial markets, with a focus on internal promotions, non-compete agreements, and market disruptions during crises.

With expertise in advanced economic modeling, data analysis, and programming (R, Python, MATLAB, STATA), I excel at transforming complex economic theories into actionable insights. Passionate about evidence-based problem-solving, I thrive in environments that integrate rigorous academic research with real-world applications.

Currently seeking opportunities in economic consulting, quantitative research, or data-driven strategy in a collaborative and dynamic environment.

EDUCATION

New York University

Ph.D. in Economics

2019 - 2025 (Expected)

- Focus: Macroeconomics, labor markets, financial markets
- Skills: Research, Data Analysis, Python, Communication, Analytical Skills

São Paulo School of Economics

M.Sc. in Economics

2017 - 2019

- Focus: Economic theory, advanced econometric modeling
- Skills: Research, Data Analysis, Advanced Quantitative Techniques

University of São Paulo

Bachelor in Economics

2012 - 2015

- Focus: Economic theory, data management, empirical analysis
- Skills: Data Analysis, Team Collaboration

PROFESSIONAL EXPERIENCE

New York University

2019-Present

PhD Candidate

- Developed advanced economic models and conducted data analysis on labor and financial markets.
- Utilized programming languages (R, Python, MATLAB, STATA) for model implementation and statistical analysis.
- Focused on research themes such as internal mobility, non-compete agreements, and market disruptions during crises.
- Built strong analytical and problem-solving skills while contributing to collaborative research environments.

Federal Reserve Bank of Richmond

May-September 2024

AEA Summer Fellow

- Engaged with leading economists and policymakers, bridging academic research with policy applications.

- Presented research to diverse audiences, enhancing communication and presentation skills.
- Explored policy-relevant topics, gaining insights into real-world economic challenges.

Federal Reserve Bank of St. Louis

August 2024

Summer Dissertation Fellow

- Collaborated with academic and policy experts to refine dissertation research.
- Presented findings to academic and policy-focused audiences, improving the ability to convey complex ideas effectively.
- Strengthened appreciation for integrating rigorous analysis with practical policy decision making.

São Paulo School of Economics

Jan 2017 - May 2019

Graduate Research and Teaching Assistant

- Conducted extensive data analysis on large administrative datasets using R and Stata.
- Provided one-on-one student support and led advanced discussions in graduate-level courses.
- Translated complex economic and econometric concepts into clear explanations for diverse audiences.

University of São Paulo

Feb 2013 - Dec 2015

Undergraduate Research Assistant

- Worked with Brazilian administrative and international datasets to support economic research.
- Gained hands-on experience in data cleaning, processing, and empirical analysis.
- Contributed to database construction and analysis for local market studies.

SKILLS

Research & Analytical Skills

- Macroeconomics, Labor Economics, Financial Economics, Policy Analysis

Technical Skills

- R, Python, MATLAB, STATA, Data Science, Advanced Econometric Modeling

Soft Skills

- Communication, Presentation Skills, Team Collaboration, Problem-Solving

KEY RESEARCH PROJECTS

Internal and External Markets for Managers

- Modeled how internal promotions affect career paths and wages, using German administrative data to assess policy impacts such as non-compete agreements.

Opaqueness and Liquidity in Over-the-counter Markets joint with Fernando Lopes and Angelo Mendes

- Examined the effects of uncertainty on asset quality, prices, and market freezes during crises, relevant to the context of the Global Financial Crisis.

LANGUAGES

English (Fluent), Portuguese (Native), Spanish (Intermediary)
