EXPERIENCE

Purdue University, Mitch Daniels School of Business
Visiting Assistant Professor

Sep 2025 – Present

- Led core macroeconomics PhD-level course to 15+ top students; teaching quantitative and computational methods
- Executed case study analysis on internal promotions and external hires, revealing that firms expand its size by 2% following a single external managerial hire, while internal promotions have a muted effect.

New York University
Graduate Researcher

Sep 2019 – 2025

- Performed causal analysis on a 32M+ observations administrative dataset, finding that 40% of new managerial positions are filled through internal promotions.
- Built a search model incorporating external hires and internal reallocation; internal markets account for 13% of aggregate productivity.
- Implemented parallelization on high-performance computer, utilizing 100+ CPUs over 7+ days for model calibration.
- Developed clustering algorithm for US and International Metropolitan Areas using HBDSCAN and gravity models; identified 450+ US clusters and 2000+ worldwide.
- Collaborated with co-authors to evaluate information transmission in asset markets; findings were presented at 4 international conferences.
- Led teaching sessions for 30+ students, providing one-on-one mentorship.
- Organized quarterly faculty-student engagement events with 90+ attendees and secured \$5K in annual funding, strengthening the NYU community.

Federal Reserve Bank of Richmond
American Economic Association Summer Fellow

May 2024 – Sep 2024

- Awarded as one of two winners; presented findings to an audience of 50+ policymakers and academics.

Federal Reserve Bank of St. Louis
Summer Dissertation Fellow

Aug 2024

- Selected as one of eight fellows; refined and presented findings to top academics in the field, fostering high-level academic discussion.

São Paulo School of Economics
Teaching and Research Assistant

Jan 2018 – May 2019

- Led recitations for 10+ graduate students on advanced economic concepts.
- Analyzed 2M+ Brazilian education records, studying role models and college access for low-income students.

University of São Paulo
Undergraduate Research Assistant

Feb 2013 – Dec 2015

- Analyzed and visualized census data from 450K+ local markets in Brazil to study economic and demographic patterns.
