PROFESSIONAL SUMMARY

I am a Ph.D. candidate in Economics at New York University specializing in macroeconomics with a focus on labor economics and firm organization. My research examines labor market structures, internal promotions, and the interaction between firm policies and individual career trajectories. I leverage micro-data alongside economic modeling to address macroeconomic questions on labor mobility, firm behavior, and economic policy.

With expertise in causal inference methods, including event studies, difference-in-differences, and regression discontinuity design, data analysis, and programming (R, Python, MATLAB, Stata), I integrate robust empirical methods with theoretical frameworks to generate actionable insights. My research bridges academic rigor with real-world applications, offering data-driven perspectives on workforce dynamics, inequality, and labor market frictions.

Currently, I am seeking opportunities in economic consulting, policy research, or data-driven strategy where I can leverage my expertise in labor market analysis and empirical methodologies.

EDUCATION

New York University

Ph.D. in Economics

2019 - 2025 (Expected)

- Focus: Macroeconomics, Labor Economics, Firm Organization

São Paulo School of Economics

M.Sc. in Economics

2017 - 2019

University of São Paulo

Bachelor in Economics

2012 - 2015

PROFESSIONAL EXPERIENCE

New York University

2019-Present

PhD Candidate

- Conducted research on labor mobility and firm organization using advanced modeling and empirical techniques.
- Focused on deriving macroeconomic implications from large administrative micro-data.

Federal Reserve Bank of Richmond

May-September 2024

AEA Summer Fellow

- Presented to leading economists and policymakers, bridging academic research with policy applications.

Federal Reserve Bank of St. Louis

August 2024

Summer Dissertation Fellow

- Collaborated with academic and policy experts to refine dissertation research.

São Paulo School of Economics

Jan 2017 - May 2019

Graduate Research and Teaching Assistant

- Conducted extensive data analysis on large administrative datasets using R and Stata.
- Provided one-on-one student support and led advanced discussions in graduate-level courses.

University of São Paulo

Feb 2013 - Dec 2015

Undergraduate Research Assistant

- Gained hands-on experience in Brazilian micro-data processing, and empirical analysis of local markets.

SKILLS

Research & Analytical Skills

- Macroeconomics, Labor Economics, Causal Inference

Technical Skills

- R, Python, MATLAB, STATA, SQL, Data Science, Advanced Econometric Modeling

Soft Skills

- Communication, Presentation Skills, Team Collaboration, Problem-Solving

KEY RESEARCH PROJECTS

Internal and External Markets for Managers (Job Market Paper)

- Modeled how internal promotions affect career paths and wages, using German administrative data to assess policy impacts such as non-compete agreements.

Opaqueness and Liquidity in Over-the-counter Markets joint with Fernando Lopes and Angelo Mendes

- Examined the effects of uncertainty on asset quality, prices, and market freezes during crises, relevant to the context of the Global Financial Crisis.

LANGUAGES

English (Fluent), Portuguese (Native), Spanish (Intermediary).
